

Greenaire Air Conditioning Systems Co. LLC

We are Sister Concern of **Green Air Technologies India** (<https://greenairtechnologies.co.in>).

GASUAE, is core engineering group focusing on providing sustainable Air-Conditioning & Ventilation solution to our customer based on their “application of use” and not just by the “brand name” GACS UAE, is managed by a team of Experts from HVAC Industry having more than 25 years of expertise in the field of HVAC, managing solutions for critical applications like Oil & Gas, Defense and Marine Solutions.

We represent **Dunham Bush** and **Trane Technologies**, as their Authorized Partners & Consultants in India with services across the Middle East (UAE) and Africa.

About Us

Our Team

Our team consists of seasoned professionals with extensive expertise in HVAC technologies. From design and installation to maintenance and support, our team is dedicated to delivering excellence at every step.

Mission & Vision

We are dedicated to upholding core values that define our commitment to excellence. Our mission is to provide superior HVAC solutions driven by:

1. Quality 2. Sustainability

3. Customer Satisfaction

Products Range:

Chillers

Air Cooled Chiller

The air-cooled chiller offers efficient cooling solutions suitable for various applications, ensuring optimal performance and energy savings.

Water Cooled Chiller

Our water-cooled chiller systems deliver reliable and sustainable cooling with advanced technology, tailored to meet specific industry demands.

Packaged Air Conditioners

Air Cooled Packaged

The air-cooled packaged air conditioners are designed for superior performance, providing cost-effective and efficient cooling solutions.

Water Cooled Packaged

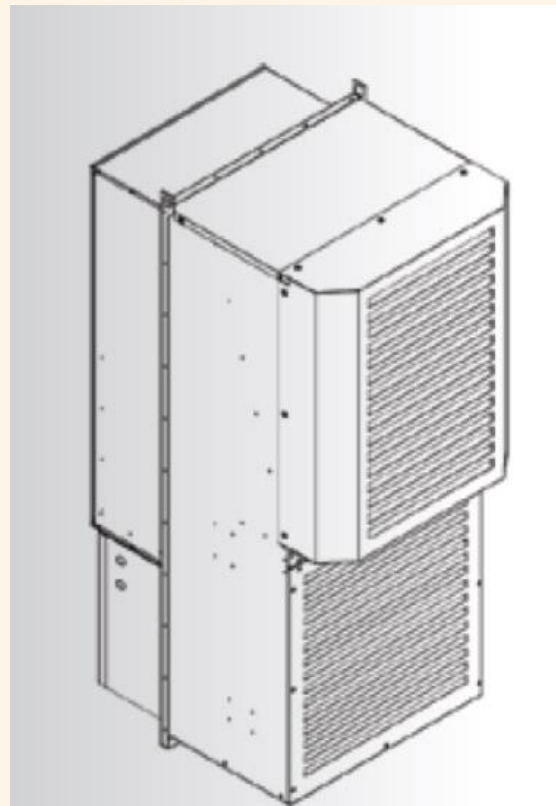

The water-cooled packaged air conditioners are engineered to deliver optimal cooling results and sustainability, meeting the specific requirements of diverse industries.

Customized HVAC Units

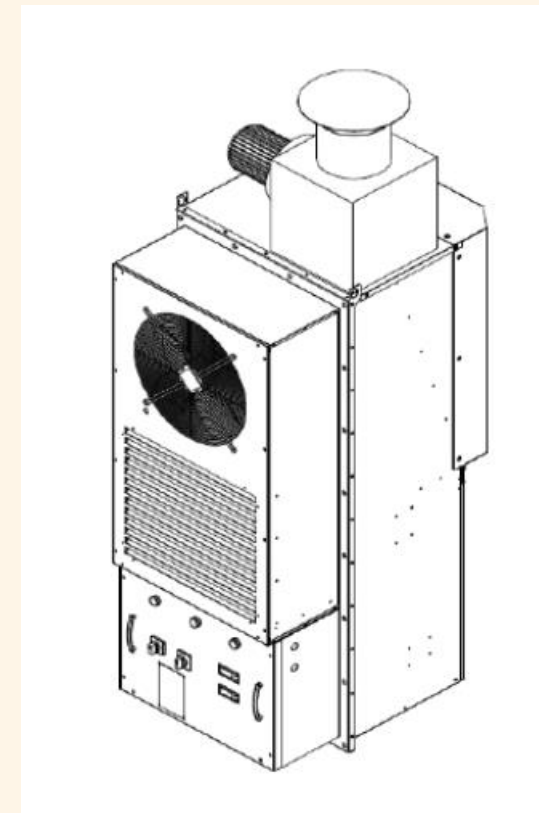

Flameproof HVAC Units

GACS' Flame-Proof Air Conditioner is engineered for seamless operation, vital for applications like control panels in remote or challenging environments. In Oil, Gas, Refinery, and Petrochemical industries, this 24x7 system ensures trouble-free functionality with a focus on safety, preventing ignition of explosive gases. Beyond safety, it excels in meeting control panel needs, guaranteeing optimal temperatures and uninterrupted performance.

Customized Air Conditioning Unit

ATEX certified Flameproof HVAC units are designed for hazardous environments with flammable substances. Complying with international safety standards, these systems feature Flame-proof enclosures, preventing potential explosions from causing harm. Constructed with robust materials i.e. SS304/SS316, they offer effective heating, ventilation, and air conditioning while minimizing the risk of ignition. These units are crucial in industries like petrochemicals and mining, where safety is paramount in maintaining operations within potentially explosive atmospheres.

EC Fans

High-Quality Fans

We offer top-notch EC fans known for their energy efficiency and excellent performance in various applications.

Fan Repair Services

Our expert team specializes in repairing and maintaining EC fans, ensuring their reliability and optimal functionality using advanced technology.

VFD Drives for Fans

1

Efficiency & Control

Our VFD drives for fans provide precise speed control and energy savings, enhancing operational efficiency and reducing energy consumption.

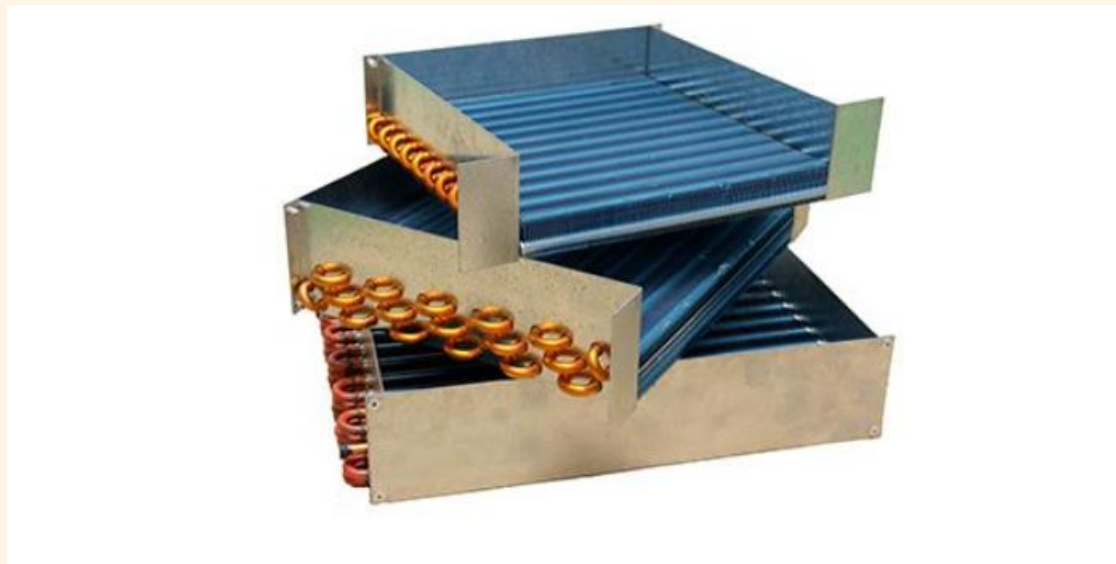

2

Customized Solutions

We offer tailored VFD drive solutions to match unique requirements, ensuring seamless integration and optimal performance.

Customized Evaporators & Condenser Coils

We can provide tailored coils to meet your specific needs, offering customization options such as size, material, and design. Our goal is to supply coils that optimize performance for your unique requirements in heating, ventilation, air conditioning, or refrigeration systems.
